ABOUT US
We are a team of data enthusiasts analyzing electricity consumption patterns using SQL and Tableau.
To analyze electricity consumption patterns across regions and sectors.
To identify trends and peak usage using data visualization.
To build interactive dashboards for better energy insights.
Through database integration and interactive dashboards, we convert complex datasets into actionable insights that support smarter energy decisions.

WORK PROCESS
Delivering reliable insights through accurate data integration and visualization.
01
Data Collection & Integration
We gather electricity consumption data from reliable sources and integrate it into a structured
02
Data Processing &Analysis
We clean, organize, and analyze the dataset using SQL to uncover meaningful consumption trends
03
Visualization&Insights
We design interactive Tableau dashboards to present clear insights that support better energy planning and decision-making.
